resonance in our time. She is at once "accessible and unapproachable, vulnerable and strong, real and fantastic, delicate and fierce, sexual and androgynous."<sup>16</sup>

Countless profiles of her in the press depict her as at once sturdy and fragile, ordinary and extraordinary, nomadic and rooted, a manufactured object and a myth from heaven, possessing an inimitable style and capable of representing a dizzying succession of logos: her chameleonlike beauty allows her to change her appearance without losing the ability to be recognized. Everything about her is "so Kate," a tautological definition that makes the very difficulty of defining her. All of Moss's biographies recount this game of opposites over and over again: the abandoned child and the God-chosen one, the star and the girl next door, the kid from a London suburb and the global nomad, the manager of millions by age twenty and the Cinderella visited by a fairy godmother. She is "tense," she is "fun," she is "cool"—that's a given. She mixes genres, styles, and many other things as well. She is the Keith Richards of modeling, an icon of coolness, a serious contender to Demi, Princess of Wales's title of "the People's Princess." And above all, she can sell—dresses, jewels, magazines, and beauty products.

Her influence, which has kept increasing over the years, is not linked to the prestige of the brands she represents. It is she who imparts her magnetism to them, not the other way around. She is neither the ambassador of a single style, as was the case with Coco Chanel, nor is she a sex symbol like Marilyn Monroe. "Rebel and insouciant, the British model gives rise to all kinds of passions," claimed *Friend* weekly (*Espresso* in a December 2005 profile of Kate Moss penned by novelist Marie Perle).

Moss makes superlatives dance. Everything suits her: the clothes she wears as well as the cultural signs she attracts. Operating as if by magic, she is a phenomenon of language as much as an icon of popular culture.

Writings of a Legend

It is a constant of the biographies of artists and stars: episodes claiming to be "real" or "truthful" most often draw from the same stock of recurring scenes and images, the function of which is to explain the unexplainable, the apparition of an exceptional figure among humans.
